

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 741128

The GEECCO project faces its first project review and holds its Advisory Group Workshop

The European H2020 project *Gender Equality in Engineering through Communication and Commitment* ([GEECCO](#)), carried out by nine European partners from seven European countries, underwent its first project review and held the first round of the Advisory Group Workshop from 8 to 10 October 2018 in Prague. The event was organised by the Technology Agency of the Czech Republic (Technologická agentura České republiky, [TA CR](#)).

GEECCO partners, project officer and the evaluator

On the first day, the consortium presented the progress status of each work package and there was also time to share questions and interesting discussions. On the second day, the first project review took place and was attended by the work package leaders, the project officer and an external evaluator. What was basically reviewed was the degree to which the work plan had been carried out in accordance with the Description of Action (DoA) of the project.

The meeting ended with the Executive Board Meeting, at which relevant issues were addressed together to ensure that the project continues to progress satisfactorily.

The agenda of the third day included two outstanding workshops, one carried out by the GEECCO Advisory Board, which was devoted to providing solutions on how to tackle resistances and obstacles to successfully implementing gender equality measures at the research organisations in the consortium. The second workshop focused on how to improve cooperation between research funding and research performing organisations participating in the project.
